

An Integrated Oil & Gas Company that  
Provides Comprehensive Services,  
Chemicals and Additives under One Roof

Kuwaiti Technical General Trading Company (KTC) is an Integrated Company in the Oil and Gas Sector. KTC was established in Kuwait back in 2016.

The company delivers a wide range of technical services, general trading, and operational support across the project lifecycle. Backed by strong local market knowledge and technical expertise, KTC is committed to the highest standards of safety, quality, and operational excellence. Over the years, KTC has built a solid reputation for reliability, professionalism, and long-term partnership, contributing to the sustainable development of Kuwait's oil and gas industry.

KTC is expanding its Well Services portfolio, with cementing operations as a key service line. Cementing is essential to well integrity, providing zonal isolation, casing support, and long-term well safety. Through this capability, KTC enhances its ability to deliver integrated, high-quality well construction services in line with industry standards and KOC requirements.

It is worth mentioning that KTC will commence its first cementing operation in 2026 for Kuwait Oil Company (KOC), in partnership with Moraik Development & Oilfield Services as Technical Partners.

**CEO WORD**

The success of KTC is attributed to proactively managing change whilst upholding the values of integrity, services and social responsibility. The majority of businesses, built on a portfolio of world leading brands, dominate their sectors.

A customer centric focus has enabled KTC to grow its business by responding to the changing needs of the customers and societies in which it operates. Our people are our greatest asset. Achieving those goals has never been possible without the continuous and faithful efforts of our employees. Surely, there are upcoming challenging, but we are quite confident and optimistic about the positive future of KTC as a national organization that will continue to work for the prosperity of our nation.

# VISION

Built in Kuwait. Powered for Kuwait. To lead the energy sector with integrated solutions, operational excellence, and a lasting contribution to Kuwait's sustainable future.

# MISSION

**01**

We deliver integrated technical services, general trading solutions, and operational support to the oil and gas sector across the full project lifecycle, creating reliable and long-term value for our clients and stakeholders.

**02**

Driven by a deep commitment to client satisfaction, excellence in execution, and continuous improvement, ensuring high standards of quality, safety, and performance in every project.

**03**

We operate with strong ethical governance, transparency, and environmental responsibility, supporting the sustainable development of Kuwait's energy sector and the communities we serve.

**04**

We invest in our people through continuous learning and capability development, fostering innovation, leadership, and a resilient organization prepared for the future.

# MORAIK

## A BRIEF MORAIK-KTC RELATIONSHIP

Moraik Development & Oilfield Services and KTC is participating in the Cementing Contract in the KOC for 2026 as Technical Partners.

Moraik Development & Oilfield Services is a well services company with a strong track record in the UAE and international operations in Sudan, India, Pakistan, Oman, and Qatar.

### History

Since 1981, we provide a wide range of oilfield services, including Cementing, Acidizing, Stimulation, Downhole Testing, Nitrogen Pumping, Coiled Tubing, Pressure Testing, Frac Tanks, and Equipment Rental.

### Success Story

Since becoming part of Al Ghaith Energy in January 2015, MORAIK has focused on deploying fit-for-purpose new equipment, building a highly skilled technical team, and using advanced technology, modern laboratories, and simulation tools to ensure the highest standards of quality and safety across all operations.

# GEOS Energy

## A BRIEF STORY ABOUT GEOS-KTC COOPERATION

Geos Drilling Fluids & Waste Management is our Partner in the MUD Tender in Category 35 in the KOC, KTC and GEOS have a Technical Agreement to support each other.

### ABOUT GEOS

Geos is a full-service drilling fluids company headquartered in Ankara, Turkey, and a recognized leader in Turkey in Drilling Fluids Systems and Waste Management Services for the oil, gas, and geothermal drilling industries.

### GEOS PLANS

The main goal is offering comprehensive portfolios of products and services in the Drilling Fluids sector — from spud mud to non-aqueous drilling fluids, and from shale shakers to complete drilling waste management and disposal solutions. GEOS have Design and R&D projects followed by two sub-divisions:

1. GEOS Design Center (GDC): GEOS established its Design Center which is recognized and certified by Ministry of Industry and Technology of Turkish Republic.
2. Research and Development (R&D): GEOS is not only concerned with providing solutions to the operators just to reach target depth.

# Gulf Energy International

## A BRIEF ABOUT GULF ENERGY INTER.

Gulf Energy International (GEI) is our sister company, it's a leading oilfield services and inspection company delivering a comprehensive range of inspection and integrity solutions from strategically located operational bases across the GCC and internationally.

GEI Inspection Services provides a full suite of inspection, maintenance, and asset integrity services designed to protect and extend the life of our clients' investments. Our capabilities include:

- Non-Destructive Testing (NDT)
- Marine & Hull Inspections
- Lifting Gear & Equipment Inspections
- OCTG Inspection Services
- Pipeline & Process Services
- Well Services
- Drops Surveys
- Leak Testing
- Pipe Management, Straightening & Bucking Operations
- Mast & Substructure Inspections
- Hydro-Blasting
- Radiation Safety (NORM) Surveys

### Why Choose GEI?

- ABS-Accredited for Hull Gauging (Renewed June 2020)
- Full Member of LEEA – Membership No. 5825 (Since November 2019)
- Certified to API Q2 (Certificate No. 0227)
- ISO 9001:2015 Certified – Registration No. 4382

Gulf Energy International combines world-class expertise with agility, adaptability, and strong local knowledge to deliver reliable, safe, and cost-effective solutions — anytime, anywhere.

# DIAMOND GOLF

## A BRIEF STORY ABOUT THE DIAMOND GOLF

Diamond Golf General Contracting for Buildings is one KTC's sister companies, it's a Kuwait-based engineering and construction company providing integrated contracting and support services across multiple sectors. Operating as a sister company, Diamond Golf complements the group's capabilities through its strong technical expertise, operational depth, and commitment to quality, safety, and sustainability.

### EXPERIENCES

With proven experience across power generation, water treatment, healthcare, defense, ports, and large-scale infrastructure projects in Kuwait, Diamond Golf continues to contribute to the successful delivery of complex projects. Supported by a structured organization, skilled workforce, and extensive equipment resources, the company remains a reliable partner within the group, enhancing overall project execution capability and long-term value creation

### PROVIDED SERVICES

The company delivers a wide range of services covering civil and infrastructure works, electro-mechanical systems, instrumentation and control, fire protection, plumbing, insulation, sandblasting and painting, as well as operation and maintenance solutions. Diamond Golf also supports projects with manpower supply, logistics, equipment rental, material supply, waste management, housekeeping services, and fully equipped employee accommodation facilities.

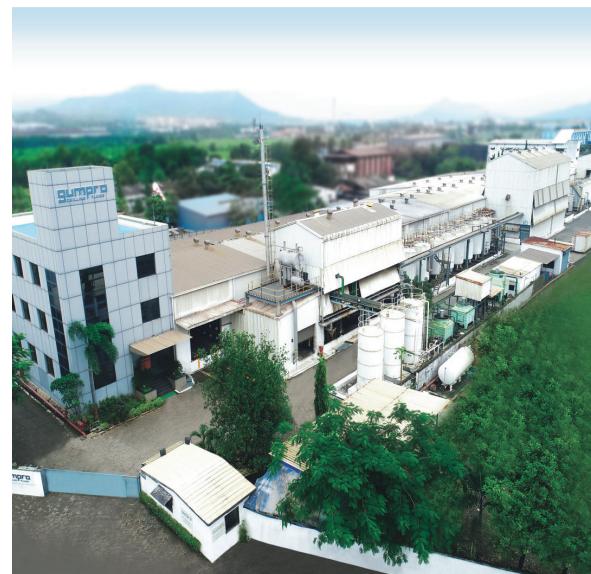

# GUMPRO DRILLING FLUIDS

Gumpro Drilling Fluids Pvt. Ltd. has been a recognized provider of specialty oilfield chemicals since 1983. With a team of more than 500 qualified professionals operating across five countries, the company delivers advanced drilling fluid solutions that meet the highest international standards of quality and performance.

## Manufacturing Excellence and Sustainable Operations: Research and Development:

Gumpro applies advanced manufacturing and sustainable production practices through automated, SCADA-controlled facilities. These systems ensure stable product quality, operational efficiency, and minimal environmental impact. Our zero-liquid discharge plants and high-temperature manufacturing capabilities reflect our commitment to responsible production and environmental stewardship.

Innovation at Gumpro is driven by a robust Research and Development (R&D) platform. Our facilities include advanced synthesis laboratories for new chemical formulations and specialized performance labs for critical testing, including API compliance, high-temperature/high-pressure (HTHP) evaluation, reservoir compatibility studies, shale inhibition testing, and particle size analysis. Gumpro holds several international patents, including the POLVO product series, which reflects our commitment to developing proprietary technologies.

# QINGDAO DOEAST

Qingdao Doeast Chemical Co., Ltd. is a leading manufacturer and supplier of food ingredients and industrial chemicals serving the oil drilling sector.

Since its establishment in 2015, DOEAST has achieved rapid growth, increasing annual export volumes from 500 tons in 2016 to over 10,000 tons by 2022. Through strong technical expertise, reliable quality, and excellent customer service, DOEAST has built long-term partnerships with clients in more than 50 countries worldwide.

DOEAST's Chemical Division specializes in additives for oil drilling fluids, including Xanthan Gum, Organophilic Clay, API Starch, Polyanionic Cellulose (PAC), and Sodium Asphalt Sulfonate (SAS). We deliver high-quality, cost-effective products with responsive, professional service tailored to each customer's specific requirements.

# Hindusthan M-I Swaco Ltd

HINDUSTAN M-I SWACO LTD.

## A STORY ABOUT HINDUSTHAN M-I

Hindusthan M-I Swaco Limited (HMISL) is a joint venture between the Hindusthan Group and M-I Swaco Limited. The company specializes in the manufacture of high-performance oilfield chemicals. Its production facility is located in Bharuch District, Gujarat, India.

HMISL is recognized as a reliable supplier to major oil exploration and production companies across India, Africa, and the Middle East, with approximately 75% of its output exported to international markets.

The company is also establishing a Cellulose Ethers manufacturing facility at Dahej SEZ to serve multiple industries, including oil drilling, food processing, detergents, paper, textiles, ceramics, construction, pharmaceuticals, and cosmetics.

### Promoters and Strategic Strength

The Hindusthan Group is a respected Indian industrial group with strong capabilities in chemicals and diversified manufacturing. Its international partner, M-I Swaco, is a global leader in drilling fluids, completion fluids, solids control systems, and waste management services for the petroleum industry.

HMISL is expanding its product portfolio to include viscosifiers, emulsifiers, surfactants, and specialized lubricants, reinforcing its position as a comprehensive solutions provider

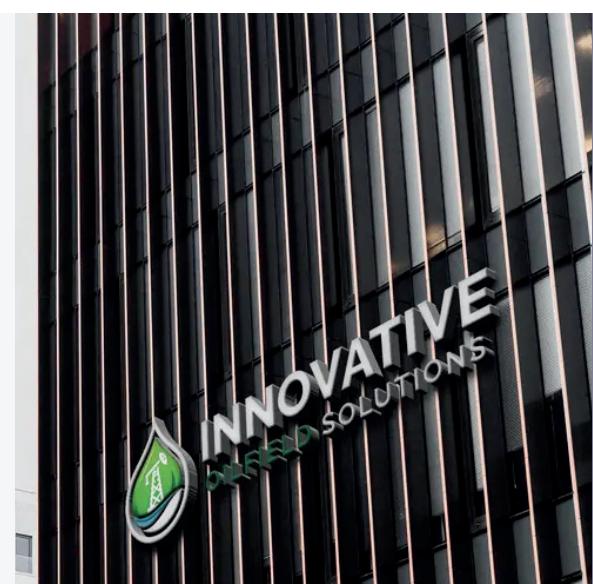

# INNOVATIVE OILFIELD SOLUTIONS

Innovative Oilfield Solutions Inc. is a global specialty oilfield chemicals company delivering advanced, performance-driven solutions across drilling fluids, cementing, and stimulation operations. The company is strategically focused on supporting operators and service companies in the Middle East and Caspian Sea regions, providing tailored chemical technologies designed for complex subsurface challenges.

We specialize in the design and deployment of customized chemical additive solutions that address critical well construction and production challenges, with particular expertise in lost circulation mitigation during drilling and cementing operations. Our solutions are engineered to enhance well integrity, improve operational efficiency, and reduce non-productive time while maintaining environmental responsibility.

Lost Circulation  
Control Additives

Gas Migration  
Prevention

Systems

# KMIX Company

KMIX is a leading industrial organization in Kuwait, playing a vital role in supporting the country's construction and infrastructure sectors. The company is widely recognized for its commitment to quality, reliability, and operational excellence, supplying cement products that meet the needs of large-scale public projects as well as private developments. Through consistent performance and strong market presence, it has built a solid reputation within the local construction industry.

# International Development Company

## A BRIEF ABOUT IDC.

International Development Company LLC (IDC) represents more than 100 international and domestic organizations, providing active promotion of their products and services to major clients across the United Arab Emirates. IDC serves key sectors including Energy (Oil & Gas and Petrochemicals), Power and Water, Telecommunications, and Construction. In 1989, International Development Company (IDC) established AIE Industrial Equipment Trading Company in Dubai to better serve commercial and industrial entities across the Northern Emirates. IDC, together with AIE, initially operated as a reputable supplier of equipment, machinery, field services, and spare parts to organizations engaged in oil and gas exploration, refining, and distribution.

Over time, the company has strategically expanded its scope of operations across multiple sectors, diversifying its portfolio to encompass project development, after-sales support, consultancy services, chemical and industrial manufacturing, as well as digital transformation and advanced technology solutions. In addition, IDC has developed dedicated service facilities within the United Arab Emirates to enhance operational support, promote asset longevity, and contribute to sustainable industrial practices. IDC Chem was established to manufacture and supply specialized oilfield chemicals tailored to industry-specific requirements.

The company's operational philosophy emphasizes close collaboration with clients to develop high-quality, application-specific solutions that address distinct operational challenges. Supported by a team with over 30 years of industry experience, IDC Chem is committed to continuous innovation and aims to expand its product portfolio by introducing at least one new product per quarter.

The current product range includes cementing, stimulation, fracturing, and drilling fluid additives, all manufactured under rigorous quality control protocols. IDC Chem operates both conventional and advanced cementing laboratories, ensuring product reliability and performance consistency.
